TURNSTILES
FOR ACCESS CONTROL

CASTLE Turnstile

General information

Universal type of tripod turnstile for passage control with a wide range of both internal and external use. The material quality, its processing as well as the robust execution of the turnstile and its resistance against temperature fluctuation guarantee reliability and long lifespan of the product. Improved design of the housing provides easy access to the mechanism for technical maintenance purposes. The mechanism is accessible via the top cover that is locked by a special key. The entry for the disabled needs to be completed with a separate gate. Anchor set included.

Use

Industrial and administrative buildings, shops, public transport, sports and leisure centres

Advantages

- ✂ Simple installation, easy maintenance
- ✂ A range of identification media and controls - according to the client's individual requirements - contactless cards, chips, remote control, bar code, etc.
- ✂ Long lifespan of mechanical construction - high-quality steel of 2 mm thickness
- ✂ The construction design allows easy

Control

Autonomous

- ✂ autonomous access unit - GPX Apr (autonomous reader of contactless cards)
- ✂ coin and token validator
- ✂ push button
- ✂ remote control

Via superordinate systems

(parametric setting of functions, parameters):

- ✂ *Access System* - all data operations can be performed (permitting and blocking of access cards for buildings and zones, statistics of persons' presence, access rights, etc.) GPA – access system: GreenPro Acces
- ✂ *Ticketing Systems* (admission tickets sale, booking, statistics, pre-paid entrance)

Characteristics

- ✂ Both two-way and one-way passage (e.g. with limited entry and free exit)
- ✂ Light indication of the passage (green/red arrow)
- ✂ Anti-panic system - dropping of the turning arm to allow free passage through the turnstile
- ✂ Turnstile has a mechanical drive (suitable for the outdoor use) or a servo drive
- ✂ Housing is made of stainless steel or steel painted with a RAL colour

Optional accessories

Type of the drive, colour, GPX Pr or GPX Apr contactless card reader or other access medium with a potential-less output contact, remote control, etc.

Technical data

Minimum width of entrance blocking	530 mm
Number of passages	15-25 persons/min.
Power consumption max.	60 W
Power supply	24+-3 V
Dimensions l/w/h	1170/260/1050 mm
Weight, max.	50 kg
Operating temperature	-25 to +45°C
